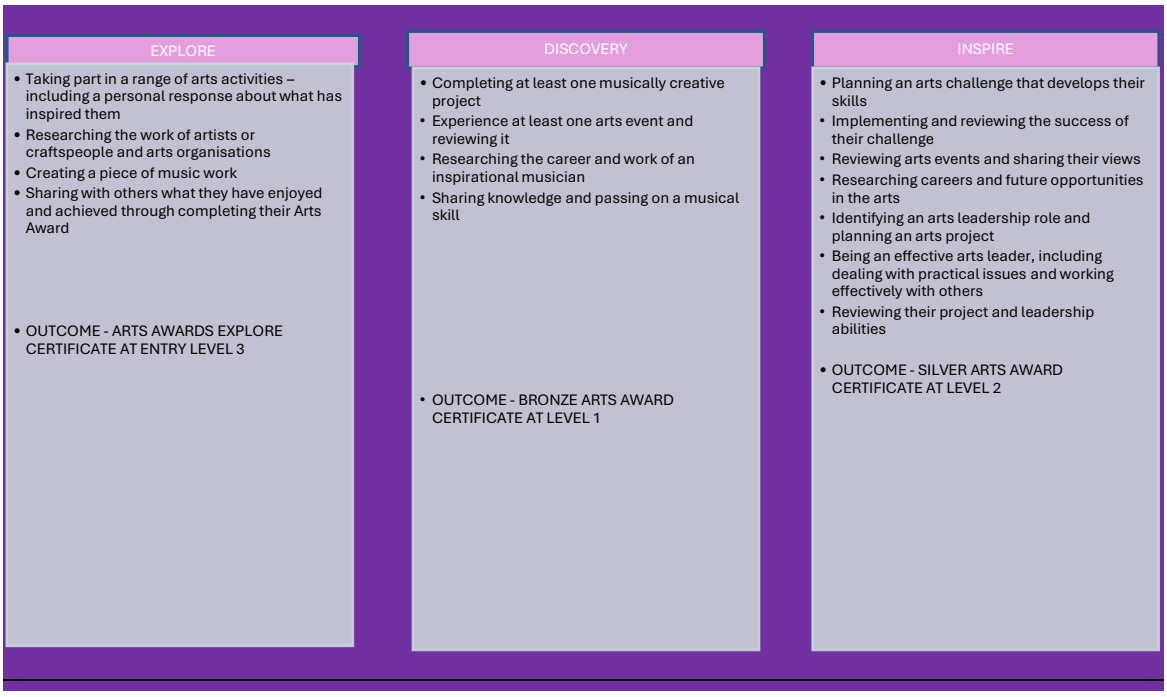
CURRICULUM PLAN – MUSIC TECHNOLOGY

At Daylesford we aim to develop creativity and broaden our pupils' ability to express themselves in positive ways. We recognise that music is an excellent way to improve a pupil's confidence, communication and cognitive ability. Technology is an integral part of modern society as well the music industry and therefore we also incorporate key ICT skills into our Music Technology course, ensuring that our pupils are also able to develop this vital skillset for the future.


On the Explore Pathway pupils complete Arts Award Explore, which encourages them to experience different musical art forms and artists, develop their creativity and share what they have enjoyed and achieved with others. On the Discovery Pathway pupils complete the Bronze Arts Award, this develops their creative abilities and their skills in research and communication. They experience music as creators and audience members and are guided through their first steps towards leadership by sharing a skill that they have learnt with others. On the inspire Pathway pupils complete the Silver Arts Award; this gives them the chance to take on an artistic challenge and a leadership role too. They will further develop their creativity, professional critique, research competency and project management.
